### Description

Coffee tables inspired by the stone monoliths of the British Isles and France, which are the archetype of the column. This research gave rise to the design of a base consisting of a steel column and marble drums with different finishes and shapes placed on top of each other.

The structure is composed of one column, made of epoxy powder coated steel in black matt finish and available in three different heights, that connects the monumental refined marble drums bases to a medium density wood fibre 3/4" thick round top, worked on the edge, offered in glossy lacquered colors or in the special inlaid and brushed open grain veneer, in black ash or dark stained walnut.

The drums have five different sizes and weights and surround the column, giving the table the necessary weight to guarantee stability and create supporting structure with a differentiated design. Monolithic elements are available in matt marble, in the Carrara Statuario white, Marquinia black, Levanto red and Alpi green finish, a chromatic variety that reveals a typically Italian tradition. Made in Italy.
