RECONSTRUCTED STONE:

Stone, cleverly reconstructed through a blend of natural and industrial materials, artificially reproduces the sedimentation process of river sandstones. This reclaimed stone-based blend enables to get quite a natural and smooth surface, soft to the touch. This excellent element mixture generates irregular shades and colours, typical of sedimentary rocks and it is further increased by its handmade application on the products. Manual application highlights surface nonuniformity, making every element unique and original, a guarantee of preciousness and uniqueness of the finished product.
