## *Description*

Dining table with mono-material finish. The important technological innovation it incorporates, combined with the tensioning capacity of the components makes it possible to build tabletops in large sizes which remain perfectly flat and also extremely light.

The 1 $\frac{3}{8}$  thick tabletop is a load-bearing composite board built with an internal frame consisting of either aluminum profiles and polystyrene filler, except for the brass top which has an acrylic resin honeycomb filling covered with two outer layers of aluminum. 1 $\frac{3}{8}$ x1 $\frac{3}{8}$  steel legs with internal structural tie-rod.

Frame and tabletops are available in:

- . Stone, in reconstructed stone, transparent acrylic finish. Top, edges and legs coated with application of 1/8" thick material

- . Stone, in reconstructed stone white Calce and black slate, this particular finish is a mineral compound composed of marble and quartz. It is spread manually over the entire surface of the table, and after application a maturation process at room temperature is required. After a manual sanding process, the material is protected with a water-based nanotechnological finish. Top, edges and legs covered with the application of a thickness of about 5/8" of material.

- . Marble, this particular finish, reconstructed marble, is made starting with marble dust that has been mixed with a filler and is then spread manually over the entire surface of the table. Top, edges and legs are covered with a sheet of material in a thickness of about 1/8. Finishes: black ebony and white Carrara marble.  
Made in Italy.
