20.Venti Light
Design: 967ARCH

Description

The 20.Venti Light collection is the result of the simplification of the 20.Venti system, to provide a wider offer able to respond to different market needs and was designed to offer an extensive choice of dimensions and finishes for working areas. The collection includes double aggregable desks with a wide range of accessories. An intentionally iconic system that renounces unidentifiable stylistic solutions. Basic minimal style that enhances both design and function.

The desks are available in different versions: for two users, for four users or the Flex version in sizes that can be customized as required by using terminal or intermediate modules in the lengths 63" or 70"7/8. All versions are equipped with cable opening on the top. The melamine tops are finished in matt white, light grey or black colors and the steel frame and legs, section 3/4"x3/4", are painted with epoxy powder in the matt colors white and graphite grey. Adjustable aluminium feet with range of +/- 3/8".

Moreover, a wide selection of accessories such as finishing panel for the side frames of desks, transparent plastic cable spring with aluminum painted base, under-top tray for cable collection, screens with clasp fitting, pc holder on wheels, stationery / document holder accessories and drawer units, are available upon request (see more details on next pages). Made in Italy.
