

Arpa

Design: Ramón Esteve Estudio

Description

A three seat sofa that combines the stability of the outer orthogonal structure, with the comfort and softness of the inside cushion. The refined cords add elegance and delicacy to each element in the range, giving a sensation of lightness, as if the entire upholstery was floating, suspended by its structure.

Backrest and seat load bearing structure in stainless steel, 3/4" x 3/4" section, epoxy powder coated using specific treatment for outdoor use in the matt goffered finish, in white, corten, pewter, and black iron colors. The pewter and black iron paint finishes have a cloudy effect, a feature and peculiarity of this particular finish. The seat frame has elastic straps, specifically for outdoor use. The backrest frame is woven by hand using high tensile polyester cord, in mass pigmented color, able to guarantee high resistance to weather, abrasion, limited elongation, and color fastness. The seats are made with original, exclusive weaving.

The back and seat cushions are made of Dryfeel (draining polyurethane) of varied densities, wrapped in siliconed hollow fiber bound in polyester, that will not rot, does not cause suffocation, and is antibacterial, while the final cover is in 100% polyester Tecno Strong. This particular composition of the cushion gives the padding natural softness and elasticity, a long lifespan and great comfort. The upholstery fabric covers every part of the cushions, and is completely removable.

The Arpa collection is available in four different combinations (see Finishes & Materials on next page for details). Made in Italy.
