

Fl@t

Design: Martin Ballendat

Description

Armchair made from a thin, flat, flexible and padded form, with internal structure in stratified technical material, which is bent to obtain a unique shell. Upholstered with fabrics or leathers as per collection or customer's own material (velvets excluded). Steel fixings hold the seat and backrest in place while creating an attractive decoration. The shell rests on an arc in black coated aluminum, connected to the base using the same material. Black lacquered 360° swivel base in die cast aluminum without memory return, available in 4-spoke or in 5-spoke with castors and height regulation. Also available in 4-spoke black lacquered steel and 360° swivel with memory return. Fl@t gives an appearance of lightness but also offers the highest level of seating comfort. Made in Italy.

Finishes & Materials

Shell: C.O.M. fabric, fabric Cat. 4 or leather Cat. 7 and 9.

Base: Black lacquered die cast aluminum or steel.

Glides: PVC.
