## Cross

## Design: Alain Gilles

## Description

Dining fixed table which is the synthesis of the cross combination of three essential elements (top, central base and lower base) that, in a refined combination, offer an evocative scenic effect. The top rests only on a thin central base, but it is the wooden lower base in the shape of a cross that gives the table its solidity and structural force.

The design of the table offers a collective vision where the role of each element emerges in relation to the others in an appealing contrast between straight lines and soft curves, between masculinity and femininity.

The three different and distinct elements that compose it offer the possibility of creating various combinations of finishes and colors, for a highly customizable complement. The top is available in ceramic or marble and a wide range of variants are offered for the finishes of the metal central base.
Made in Italy.
