

Arbor

Design: Dondoli e Pocci

Description

Side table distinguished by the high graphic value of the base, an element that is both functional and aesthetic: an expressive geometric line, a slight and delicate frame which is at the time solid and resistant. The base in curved metal rods, with a highly decorative value, is a stylized corolla made of silhouettes of petals that support the thin but precious top, made in the same finish as the base, or in different types of glass or ceramic.

The open base can be completed with a painted metal bottom, which serves as a practical magazine rack or tray for objects. Available in 3 different sizes, these tables can be used as unique elements or in groups, to create original compositions. Made in Italy.
