

Croma

Design: Luca Nichetto

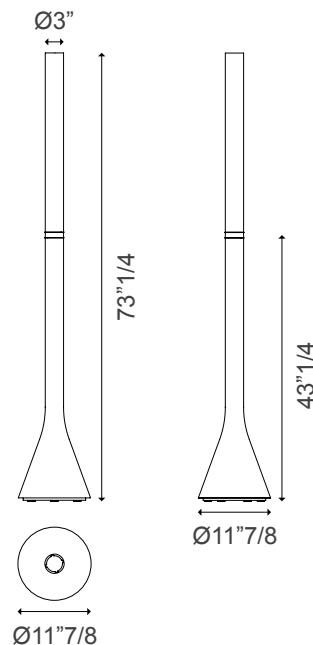

Description

Floor lamp which features a conical base that provides stability and a sleek body which casts a powerful ray of light from its LED source. A ring conveniently positioned halfway up the stem allows the user to control the LED module, and to use its dim-to-warm function.

In contrast to the classic floor lamp, which typically opens out at the top, the structure of this lamp is turned upside down to create a revolutionary product. Made in Italy.

Dimensions

Ø11"7/8 x 73"1/4H

Light Source:

LED • Dim-to-warm from 2200 K to 3200 K • 42 W / 5200 lm
