

Ombrina

Design: Antonino Sciortino

Description

Ombrina is an outdoor gazebo, deliberately essential and practical. Its structure, formed by a horizontal roof made of polyester belts that break up the sunlight and a slender and transparent frame, defines a project from the Mediterranean soul. The gazebo can be easily moved thanks to practical wheels while the optional curtains, in white or grey mélangé colors, help to create an intimate and private setting, away from prying eyes. Optional stone anchors (set of 2 pieces, 39,6 lbs or 18 Kg each). Made in Italy.

Finishes & Materials

Structure: Powder coated stainless steel.

Wheels: Nylon.

Belts: Polyester.

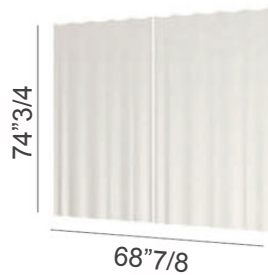

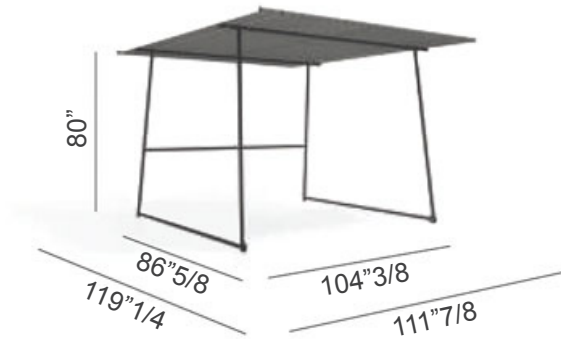

Courtains: White polyester fabric Trevira CS or grey 100% acrylic fabric.
