

Rocket

Design: Ono Design

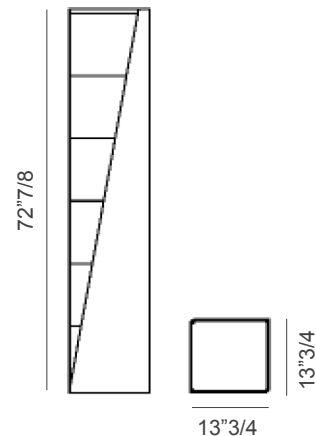

Description

Bookcase made of titanium or bronze embossed lacquered steel. It stands out for its design that allows multiple possible combinations. Positionable against the wall or in the centre of the room. Its compact size makes it suitable for a narrow wall, a reading corner or an elegant hallway. However, this design bookcase is highly capacious with seven useful shelves.

Furthermore, several modules can be placed side by side, maintaining their direction or rotating them, to create an intriguing geometric composition marked by diagonal cuts and with the shelves visible or hidden to varying degrees. Made in Italy.

Dimensions

13"3/4W x 13"3/4D x 72"7/8H

Finishes & Materials

Structure: Embossed lacquered steel (Titanium / Bronze).
