

Maxim Argile

Design: Pio e Tito Toso

Description

Table with base in cement and round top in MDF. The table is completely spatulated in clay, lending it an organic look. The sculptural design stems from the seamless link between its shape, consisting of three petals, and the material it is made from.

A fixed table that derives from manual craftsmanship and a cold moulding technique, which does not involve exploiting energy resources. The industrialized processes are only to support the high artisan component of the manual phases of pouring the liquid cement and the finishing. The base of this modern table is in fact finished in clay, with earthy and natural shades. Made in Italy.
