

Arx

Description

A floor lamp in embossed lacquered steel with a perfect geometric balance. The round, full base contrasts with the luminous circumference on the other end of the arched structure.

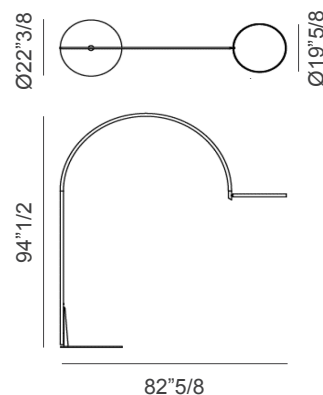

The decorative details are minimal, but no less striking. Looking at the base of the design floor lamp, you can see a hole whose shape seems to reproduce the section of the lamp seen from above; to this is added a slender triangular solid that connects the large metal arch to the base, making the structure more dynamic and original.

The last elegant and discreet detail is the diagonal cut at the end of the arched structure, which delicately joins the circumference equipped with internal LED lights (included). Made in Italy.

Light source: 110/220V LED 26W

Dimensions

82"5/8W x 22"3/8D x 94"1/2H

Finishes & Materials

Structure: Embossed lacquered steel
(Titanium / Bronze).
