

Pivot

Design: Marconato and Zappa

Description

Fixed table with a strong personality, where the asymmetric elements of its base are enhanced by the skilful use of materials. The Pivot table takes its name from the unusual shape of the base: the central leg acts as a pivot for the three legs which extend to the sides. The result is an asymmetric and highly original combination.

The legs are made of solid wood with metal inserts, while the top is available in marble, wood, glass or ceramic, in the two round and rectangular with round edges versions. Made in Italy.
