EMPERADOR DARK

TECHNICAL FEATURES

This material, coming from Spain, is a spotted brown color with varying intensities of shades of brown and white grains. In its natural form, it has cracks, which in the processing stage are closed with resin and / or pieces of the same material.

The surface is thus uneven due to the presence of natural micro-holes that determine the characteristic of the marble. These microholes are also create a different refraction of light compared to the polished parts. Emperor Dark is a natural product, whose unique characteristics, which upon unthorough examination may be mistakenly considered "defects", are to all intents and purposes distinctive characteristics of the material.

The processing is carried out with care and craftsmanship, using the latest generation of machinery; for the final polishing natural waxes are used, prone to respect the very essence of the nature of the marble itself. For a proper sealing of the material it is advisable not to pour acidic substances such as carbonated and / or alcoholic drinks, oil, wine, vinegar and various citrus fruits or in any case to remove them immediately, so they can't erode the polish.
