

## Hexagon

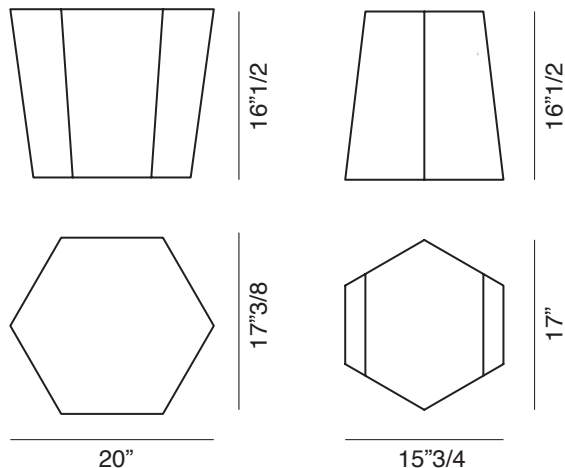

### Description

Hollow modules made from Lecce stone or okumé plywood. The Lecce stone is a limestone from the region of Salento (in south-east Italy) able to withstand extreme weather conditions. Okumé, also known as gaboon, is a wood from tropical West Africa, resistant to humidity and light rain. The stools with natural okumé finish have a sprayed-on transparent water and acrylic and polyurethane resin based protective outdoor coating. The white okumé stools have a white mono-component waterbased outdoor coating.

### Dimensions

20"W x 17"3/8D x 16"1/2H  
15"3/4W x 17"D x 16"1/2H

### Finishes and materials

Structure in: Transparent varnished okoume, white varnished okoume or Lecce limestone.
