

Petra

Design: Bartoli Design

Description

Two different materials combined into coffee and side tables. Petra tables are designed to be used as individual items or in a group of more pieces. The base is off-center and the different heights create a play of overlapping surfaces and unusual matches of several simple and austere geometric shapes. Cylinders, circles, squares and rectangles allow several design solutions.

Finishes and materials

Base: Metal; micaceous brown, titanium or brass.

Top: Matt Emperador marble or sandstone.
