

Icaro Ball

Design: Brian Rasmussen

Description

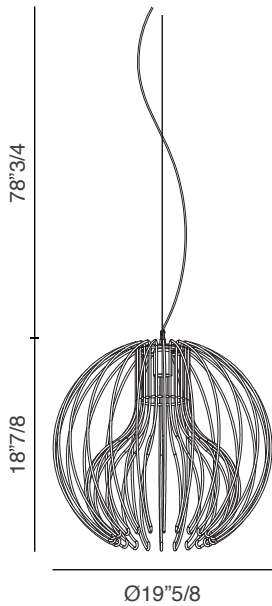

The Icaro Ball suspension lamp has a body in natural steel wire, or painted black or white matt. The exposed light bulb can be covered by a stripe diffuser in removable material for the indoor version and enclosed in an hermetic white satin glass case for the outdoor version. For the outdoor version, the metal parts are protected against atmospheric agents, with electrolytic galvanizing treatment and finishing with resistant polyester coating.

Finishes and materials

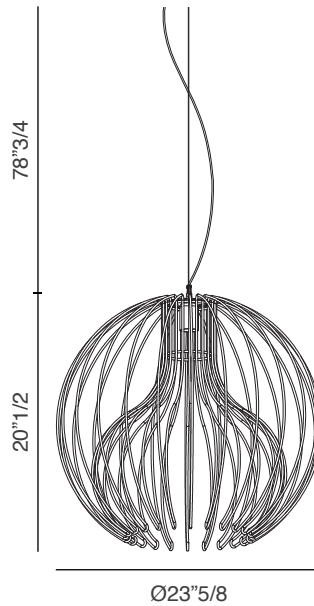

Body: Natural steel wire, or painted black or white matt.

Stripe Diffuser: Removable material (cotton) for the indoor version and enclosed in an hermetic white satin glass case for the outdoor version.
