

# 14 Collection

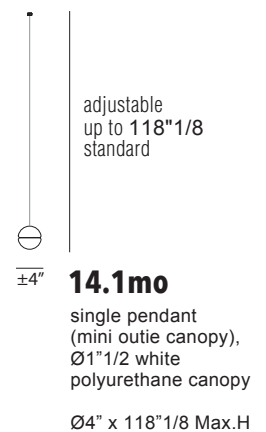

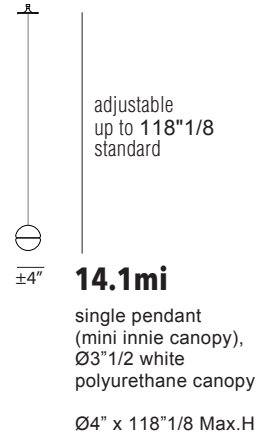

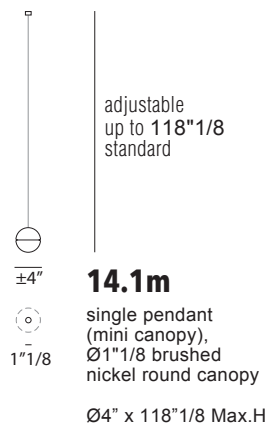

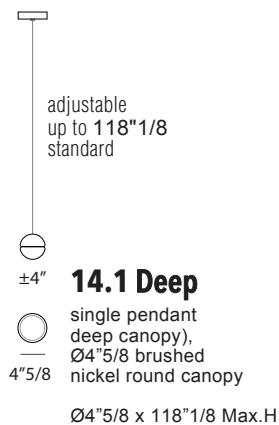

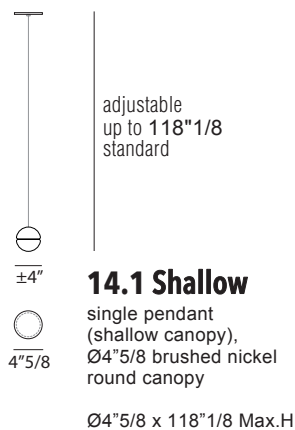

## *Description*

14 is an articulated, cast glass sphere with a frosted cylindrical void that houses either a low-voltage xenon or LED lamp. Individual pendants are visually subtle, but gain an atmospheric quality when multiplied and clustered in groups.  
Designed by Bocci.

## *How to calculate the desired heights:*

## *Frequently Asked Questions:*

### Are the pendant lengths adjustable?

You can adjust the lengths on site for the strain relief fixtures, 14.1/3/5/7. All the larger chandeliers (14.11 and above) come with preset, jack connected lengths that are specified by you at the time of ordering.

### Can the pendants be larger/smaller than 4" in diameter?

All 14 pendants are 4"—but the 28 collection pendants are larger and more customizable should you need more room to play.

### What is the color temperature of the LED?

Approximately 2400k, (our 10w xenon is 2550k).

### Is this a low voltage fixture? If so, what is the voltage?

Yes, the voltage is 12V.

### Are transformers included?

Yes. They come wired integrally within the canopy.

### Are bulbs included?

Yes, our long life xenon bulbs are included in the price. If you would like LED bulbs there will be a surcharge. Replacement bulbs are available

### Do the pendants come in any other colors?

They are also available in smoked grey or amber glass, with a surcharge.

### Can I install my fixture outside or in a wet location?

Only the 14s and 14sp are rated IP65 and suitable for outdoor and wet locations.

### Not all my 14 pendants look exactly alike, is this normal?

Yes, each half sphere is hand poured and drilled thus making it different and unique from the rest. We celebrate this uniqueness, as this is a sign that yours is truly one of a kind.
