

## 28 Copper

Design: Omer Arbel

### Description

Wall lamp with flexible copper tubing. The surface light has a 1/2" deep by Ø2"3/8 copper mounting plate designed to be mounted on walls as well as ceilings.

28 is an exploration of specificity in manufacturing. Instead of designing form itself, here the intent was to design a system of making that yields form. Individual 28 pendants result from a complex glass blowing technique where by air pressure is intermittently introduced into and then removed from a glass matrix which is intermittently heated and then rapidly cooled. The result is a distorted spherical shape with a composed collection of imploded inner shapes, one of which acts as a shade for the light source.

The 28 copper series provides a different compositional reading that results from shaping the copper tubing during installation. Pendants can be angled in any direction to provide a range of sculptural forms. The copper will weather and tarnish, registering the passage of time in its patina. Standard 28s are made with clear glass exterior spheres and milk white interior lamp holder cavities. 28s are possible with infinite versatility in color compositions, sizes and shapes. Designed by Bocci.

### Finishes & Materials

Ø 6"1/2 + Flexible copper tubing: 19"5/8

**Light source:** 1.5W LED - 2500K or 20W Xenon - 2600K

### Finishes & Materials

**Pendants:** Clear or colored glass.

**Structure:** Flexible copper tubing.
