Barovier&Toso®

Barovier&Toso®

Description

A constantly changing chandelier, which once again revolutionises the concept of the genre: the elegant arms, available in three metallic finishes (black chrome and gold) and which can be arranged in multiple combinations, rotating around the center and allowing the creation of a different chandelier every time.

It is available in nine models, but with infinite possible arrangements – from four to twelve lights, and in five color combinations for the diffusers.
