

57

Design: Omer Arbel

Description

Suspension lamp with structure in brass finish. Pendant available in blown and dipped grey or white opaline glass. White opaline pendant comes with an additional light source. Mirrored option is also available. This lamp is an exploration of a technique used for producing closed cell foam. The process involves trapping voids of air of different sizes and configurations within a glass matrix, yielding a shape loosely referencing a rain cloud.

Designed by Bocci.

Finishes and materials
