

Swing

Design: Barovier&Toso

Description

With similarities to a saxophone, the Loch Ness Monster or a cornucopia, the handmade element that makes up the Swing light is an elegant surface-worked glass that adds a wonderful dynamism and amazing attention-capturing presence to this collection. Supported by thin steel cables that are fixed to the thin chrome ceiling structure or directly to the ceiling, these elements produce gently curving and swaying circular shapes. The light is projected onto the elements by powerful dimmable LED spotlights, which are fitted into the ceiling support (canopy) in the circular models. These circular models have an opalescent luminous surface that contributes to the ambient light. Made in Italy.

Finishes and materials

Elements: Murano glass in Crystal (CC), Grey (IC) or Brown (BW) color.

Canopy: Polished chrome (CL).
