

## AX

*Design: Gino Carollo*

### *Description*

Extendable table which pure silhouettes and a geometric language are its distinguishing features, making it a simple and light-weight object, yet at the same time characterized by a solid shape.

The name derives from the shape of the base, which is formed by two criss-crossed components in an X, offered in painted metal in different colors or burnished finish. The rectangular top and the two extendable leaves, are available in wood or ceramic. The appeal of the material contrast between the top and the base makes any decoration almost superfluous. Made in Italy.
