

# Obel

*Design: Roberto Paoli*

## *Description*

Obel is an important standing frameless wall mirror that, thanks to its large reflective surface, allows the individual to play the starring role.

The trapezoidal shape, consisting of a thin structure with blunt contours, has a wider thickness at the base and a narrower one at the top, giving movement to the whole.

The wooden structure is available in American walnut. Obel's conspicuous size, as well as the rounded and sinuous profile, ensures a spectacular result of great impact.  
Made in Italy.

## *Dimensions*

29" 1/2W x 8" 1/4D x 74"H
