

20.Venti Home

Design: 967ARCH

Description

Desk created mainly for the domestic environment. It fits perfectly in all rooms of the house thanks to its neutral, simple, compact and linear design, the highest quality of materials and the warm hug of the fabric.

It comes in one size with adjustable aluminum feet with range +/- 3/8. The structure is composed by a steel frame and legs (section 3/4"x 3/4") painted with epoxy powder in matt white, black nickel or bronze colors. The top is made with oak veneered medium density fibre panels, brushed and open pore, in the colors bleached, light and anthracite oak.

This working desk has a small drawer that can be accessed through a flap door on the desktop with hydraulic lift; it can be used as a little compartment for small everyday items, stationery, smartphones or tablets. It also has a valet tray matching the top. The front of the desk is notable for its Divina Melange cloth bag, which combines the functionality of a little space for storing objects or magazines with the iconic image of a soft, domestic, and textural object.

Moreover, upon request, some accessories made of sheet steel painted with epoxy powders in the matt colors white or graphite grey, are available in 2-piece kits, and divided into the following options:

Pen holder • Bookends • Horizontal document holder • Vertical document holder.

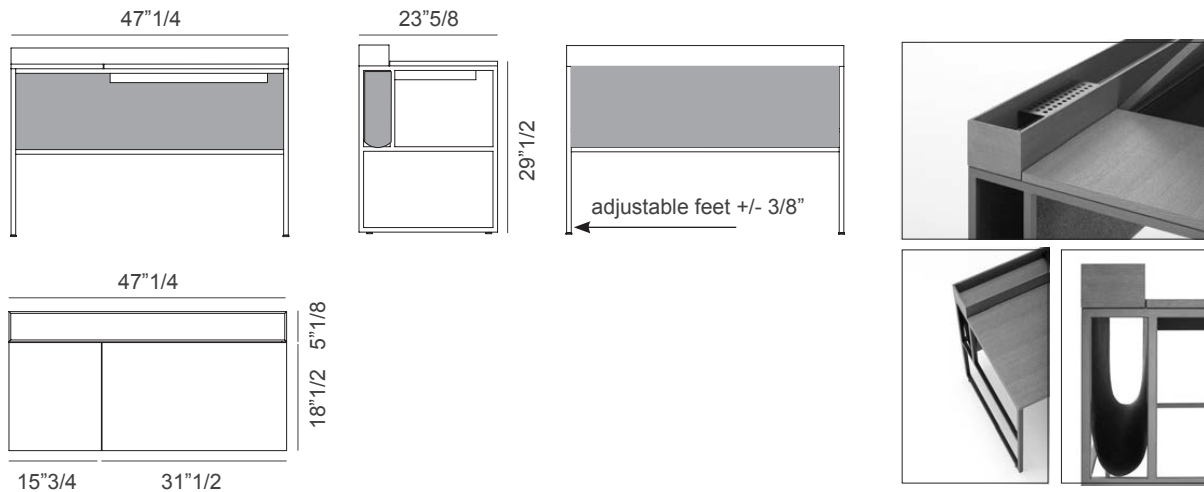

Made in Italy.
