

Tense

Design: Piergiorgio & Michele Cazzaniga

Description

A dining table with a monochromatic finish. The important technological innovation it incorporates, combined with the tensioning capacity of the components, makes it possible to build tabletops in large sizes which remain perfectly flat and also extremely light.

The table is available in the versions:

- . Acrylic resin and rock minerals. Top, edges and legs covered with a 1/8" thick sheet of resin.
- . Acrylic resin and FENIX® high-pressure stratified laminate of the latest generation. Top in stratified laminate with mass coloration; edges and legs in acrylic resin and rock minerals.

The 1 3/8" thick top is a load-bearing composite board built with an internal frame consisting of either aluminum profiles and polystyrene filler, or an acrylic resin honeycomb and two outer layers of aluminum. 1 3/8"x1 3/8" steel legs with internal structural tie. The acrylic resin coating is in the same matt colors as the tabletop. Made in Italy.

Finishes & Materials

Top: Acrylic resin / FENIX®.

Frame: Resin, same color as top.
