

## Arpa

*Design: Ramón Esteve Estudio*

### *Description*

An ottoman that combines the stability of the square structure, with the comfort and softness of the inside cushion.

Seat load bearing structure in stainless steel, 3/4" x 3/4" section, epoxy powder coated using specific treatment for outdoor use in the matt goffered finish, in white, corten, pewter, and black iron colors. The pewter and black iron paint finishes have a cloudy effect, a feature and peculiarity of this particular finish. The seat frame has elastic straps, specifically for outdoor use.

The seat cushion is made of Dryfeel (draining polyurethane) of varied densities, wrapped in siliconed hollow fiber bound in polyester, that will not rot, does not cause suffocation, and is antibacterial, while the final cover is in 100% polyester Tecno Strong. This particular composition of the cushion gives the padding natural softness and elasticity, a long lifespan and great comfort. The upholstery fabric covers every part of the cushion, and is completely removable.

The Arpa collection is available in four different combinations (see Finishes & Materials on next page for details). Also, a protective rain cover in light gray color, is available upon request.  
Made in Italy.
