

# La Grande Table

*Design: Xavier Lust*

## Description

Table made with a curved natural aluminum sheet, available in the finishes: matt painted aluminum, matt painted white or gloss painted white.

Besides assuring the lateral and longitudinal stability of the tables, the reinforcement beams (in height 2<sup>3</sup>/<sub>4</sub> with tables to 94<sup>1</sup>/<sub>2</sub> and in height 3<sup>3</sup>/<sub>4</sub> with larger sizes) and the supporting L-shaped profiles make it possible to have pieces of different thicknesses according to size, thus further improving them visually: in 31<sup>1</sup>/<sub>2</sub> depth tables the aluminum thickness is 1/8", in the 35<sup>3</sup>/<sub>8</sub> depth tables the aluminum thickness is 1/4".

The design of the table and the peculiarity of the bending in the aluminum sheet produce structural curvatures in the tabletop both in length and transversally. Such curvatures are a specific feature of the table. Made in Italy.
