*Design: Bruno Fattorini*

### *Description*

A simple and pure shelf capable of conversing with different shapes and of aggregating fairly with different products. A “universal” line, useful for every need.

Top made from MD wood fiberboards, coated with different finishes.

The white finish matches with the Tense collection while the wood, reconstructed stone and reconstructed marble finishes match with the Tense Material collection.

Structure with bearing bracket made from steel powder-coated in aluminum grey. Adjustable inclination with special soft perimeter profile (about 3/8”), that enables an easy and perfect installation (to make up for the various irregularities of wall structures).

Also available in electrified version, with cable management door and back interspace to make cables pass and be hidden. Door available in matt white for the acrylic resin, reconstructed stone white Calce and reconstructed marble Carrara white version; in matt black for the other versions.

Made in Italy.

### *Finishes & Materials*

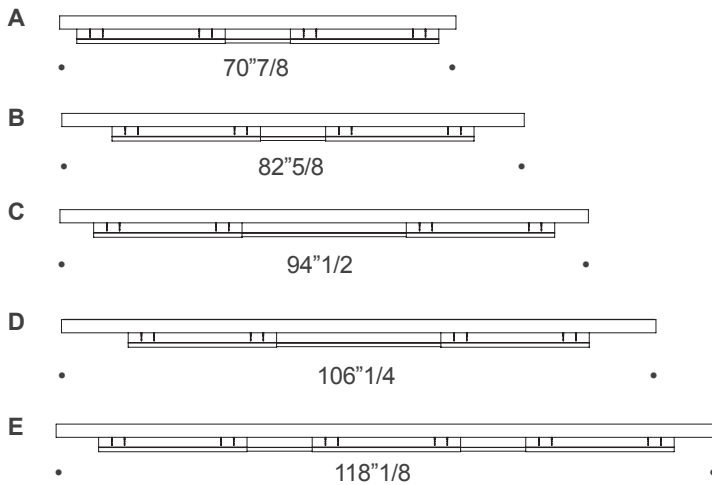

**Wood top coated with:** Solid Surface White / Wood / Carbonised Wood / Fine wood, Italian walnut / Reconstructed stone / Reconstructed marble (Black Slate / White Calce).

\* For more specifications, please refer to the “Finishes & Materials” PDF
