

Combination

Design: Alain Gilles

Description

Side table available in two different heights. The union of the circle, rectangle and half sphere creates an object whose perception and interpretation vary according to the observer's point of view.

When seen from the front, the rectangular element looks very wide; the same element, when observed from the side, on the other hand, appears to be extremely slender.

The base offered in a wide range of metal finishes while the top is available in the same finish as the base or in ceramic or marble finish. Made in Italy.
