

Pil

Design: Alessandro Busana

Description

Chair upholstered in fabric, leather or eco leather with structure in steel and padding in high density, shrink-resistant rubber. Available in different versions, with low or high backrest.

The main components of Pil chair are the backrest and the seat cushions. The latter features a fold in the middle, created to generate an enveloping effect that physically and visually emphasises the feeling of softness. The base consists of metal legs, with the crossbars set at a special angle, to create an original graphic interweaving effect.

Upon request, a tape detail in the backrest is available in the same finish as the cover. The cover is not removable. Made in Italy.
