*Design: Massimo Castagna*

## *Description*

Modular bookcase with wall or ceiling fixing, composed of vertical wooden uprights with inserts and supports in polished chrome or gold, and horizontal beams in solid Siberian ash or Eucalipto. The uprights are made lighter by frontal and lateral slots. The horizontal beams physically and visually define its form and metrics. The structure supports shelves and storage units allowing various functions and dimensions. The bookcase can accommodate horizontal storage units in glass with flap-down door in wood and vertical storage units in glass with hinged door in wood. A desk and a TV storage unit in wood are also available. The extra clear or smoked glass shelves, with particular lateral slots, are fixed to the uprights by an interlocking system on pins. A fall arrest security system is included with each shelf. Made in Italy.
