

## 118

### *Description*

These refined suspension lamp models from the exclusive 118 lighting collection is composed of three or seven hand-blown glass pendants that attach to a single cluster canopy. The cluster arrangement suspends the pendants from coaxial cables to compose hexagonal configurations. Each pendant includes 118"1/8 of coaxial cable, which can be adjusted on site. Longer lengths are available for an additional charge. Lamps and power supplies are included.

The 118 series captures delicate, feather-like impressions formed during the glassblowing process—subtle marks that glass retains from its molten state. These intricate textures, preserved in the material's memory, evoke natural motifs such as a bird's wing or a blooming flower. When illuminated from within, the internal complexities of each pendant come alive, revealing a refined interplay of light and form. This series showcases a sophisticated understanding of glass's unique ability to hold onto ephemeral shapes, turning fleeting gestures into lasting impressions.
