

118

Description

These refined suspension lamp models from the exclusive 118 collection is composed of 13 or 19 glass pendants that attach to a single cluster canopy, using a fixed length connector. The cluster arrangement suspends the pendants from coaxial cables to compose hexagonal configurations. Longest lengths are determined by client. The specified longest length is measured from the underside of the canopy to the underside of the pendant. Up-charge applies for cable lengths over 118"1/8. Lamps and power supplies are included.

The 118 series captures delicate, feather-like impressions formed during the glassblowing process—subtle marks that glass retains from its molten state. These intricate textures, preserved in the material's memory, evoke natural motifs such as a bird's wing or a blooming flower. When illuminated from within, the internal complexities of each pendant come alive, revealing a refined interplay of light and form. This series showcases a sophisticated understanding of glass's unique ability to hold onto ephemeral shapes, turning fleeting gestures into lasting impressions.
