Description

Suspension lamp with blown glass with braided metal coaxial cable.

It results from blowing liquid glass into a folded and highly heat-resistant ceramic fabric vessel.

The resulting shape has a formal and textural expression intuitively associated with fabric, which becomes permanent and rigid as it cools. A flat LED is positioned to fill the resulting volume with diffuse light, accentuating the volumetric perception of the piece.

A flexible suspension system enables pendants to be nestled in close-knit groups or loosely composed in a wider field, allowing each piece to be perceived individually.

Pendant available in clear, grey 1, grey 2 or grey 3.

Longest and shortest lengths are determined by client, Bocci fabricates all lengths between these measurements. Specified shortest and longest lengths are from the underside of the canopy to the underside of the pendant. There may be variance of $\pm 1/8$ " on specified shortest and longest lengths. Up-charge applies for cable lengths over 137"3/4.
