

Akumal

Design: Paolo Cattelan

Description

Wall mirror that perfectly combines function and decorative appearance, available in mirrored fumé glass with fumé glass frame. Optional: LED light.

The vertical shape can comfortably reflect the human figure, but its refined elegance is what immediately catches the eye. A mirror full of irregular sinuous curves that embrace the room. It is composed on two levels: the upper one is mirrored while the lower one is smoked transparent. When equipped with LED light, facing the wall as a light frame, the decorative function of this design mirror increases further. Made in Italy.
