

Milky Way

Design: Mauro Lipparini

Description

Expanding the aesthetic dimensions of the domestic space, the Milky Way sofa is named for the galaxy that is our solar system's home. Thoughtfully crafted in every detail, Milky Way can alternately serve as the place in your home to relieve the stresses of the day, to entertain those one holds dear, and to envisage new tomorrows.

With its generous, gently rounded cushions set off by the structure's striking, quilted vertical lines, Milky Way both invites complete relaxation and excites the imagination. Its upholstery and armrest options allow you to make sure Milky Way is perfectly suited for your dreams, whether met in repose or with eyes wide open.

Finishes & materials

Structure: Wood.

Upholstery: Fabric.

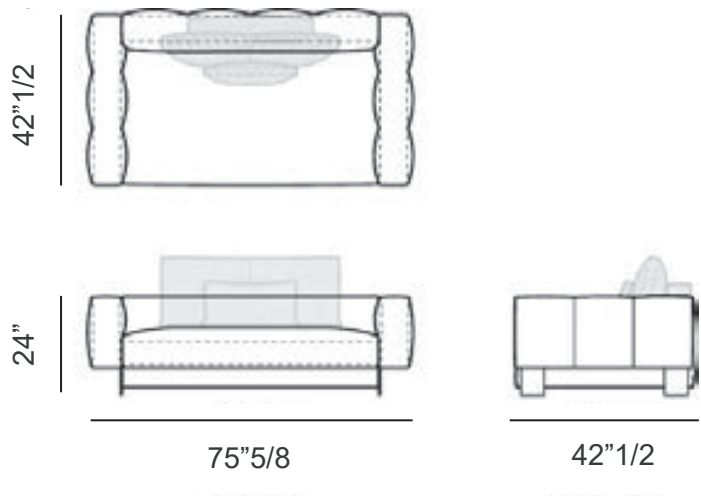

Feet: Metal.
