

Iris

Design: Tonelli design studio

Description

Wall mirror in convex curved glass, silvered by hand, available in clear mirror, smoked mirror or bronze mirror. Eventual imperfections are considered peculiar characteristics of a strictly and authentic craftsmanship processing. Available with optional LED COB 3000K lighting with or without remote control for on/off function and regulation of the light intensity.

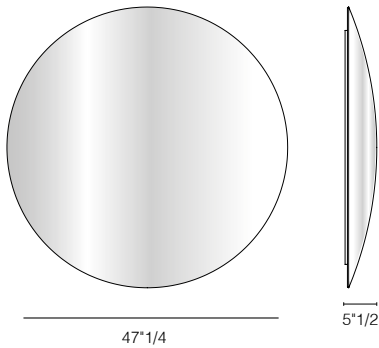

Iris combines the perfection of the sign with the magic of the warped reflection of space. Obtained from a single slab of glass curved through heating and silvered by hand, it is an object that catches the eye and dominates the environment.
