## Description

Pepita is a collection of lamps inspired by the shape of gold nuggets. As its name suggests, it calls to mind a multifaceted piece of precious metal, which changes and transforms depending on the perspective.

In the same way, it is capable of transforming the space thanks to its shape which is deliberately irregular, and thanks to the finishes of the glass lampshade which characterize the personality of the lamp, thereby creating different lighting atmospheres depending on the compositions. Here is presented the suspension version with 1, 3 or 5 pendants. Made in Italy.
