

Air

Design: Daniele Lago

Description

Elegant shelving floating atop solid tempered-glass supports is how the Air console table presents itself. An essential design, to complete the look of your entrance space or living area.

In the wooden version, the Air console can also include a practical, hidden drawer, integrated into the edge, and hidden from view. All thanks to its elegant 45° workmanship and a continuous grain. The piece creates a magical floating effect, lightening the feel of the whole space. This captivating look is achieved through the contrast between the full top and transparent tempered-glass base.

Lightweight solid oak from certified forests flaunts its seductive grain across an 3"1/8 thick top. Thanks to a minimalist design and contra-position to subtle glass legs, the age-old rough wood material has a fresh, contemporary impression.

Made in Italy.
