

Steps

Design: Monica Graffeo

Description

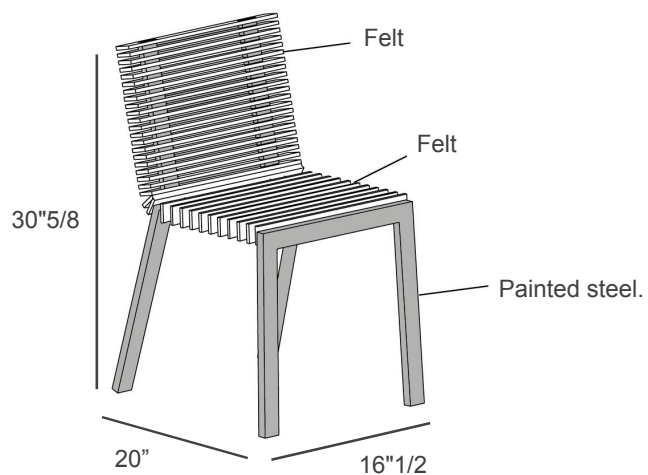

Steps is a chair that respects the environment, with a seat and chair back that are made of industrial felt and rest on an aluminum frame, which are fully recyclable materials. This makes the packaging extremely compact and reduces the environmental impact by 50% compared to traditional solutions. These innovative materials also give the chair an elegant, light look. Felt is an unexpected material which makes it possible to obtain a comfortable seat characterized by an elegant and clean shape. The felt pieces are oriented along their width, ensuring solidity and comfort to the backrest and seat.

Non-stackable chair.

Made in Italy.

Dimensions

16"1/2W x 20"D x 30"5/8H
