

Air

Design: Daniele Lago

Dimensions

The Air lounge chair is a synthesis of lightness and transformability. Floating above almost invisible glass supports, it boasts a sophisticated, iconic design – ideal for practically and elegantly furnishing home environments, as well as offices, communal areas and hotel suites.

An innovative, patented coupling/uncoupling mechanism for the seats and backrests allows you to reconfigure the Air lounge chair easily. This provides ultimate flexibility for your compositions, helping you reinvent the look of your spaces time and time again.

The lounge chair legs are made from tempered glass, which is six times stronger than normal glass, making it highly resistant to impact, heat and changes in temperature.

Available optionals: 1 back cushion with panel and 1 decorative square soap-shaped cushion. Both types are filled with goose feathers.

Made in Italy.

Finishes & Materials

Cover: Fabric (Cat. B or C), Eco-Leather and Leather.

Legs: Tempered Glass.
