

# Tell

*Design: Daniele Lago*

## Dimensions

The Tell side table is designed to accompany you during the time you spend chatting and relaxing in good company. The glass structure is 3/8" thick and has a vertical design, with the base providing balance and stability. See-through glass and textured XGlass finishes alternate to give this piece personality. Structurally flawless thanks to the 45° glass cut, its height makes it versatile to use alongside a sofa. The plate at the base of the table masks a special counterweight that guarantees extreme stability and facilitates movement.

Alternatively, combine it with other tables in the middle of the living room to create elegant compositions with different shapes and volumes.

Both extremely versatile and freely movable alongside different pieces of furniture such as sofas, beds and other occasional tables, Tell adds an elegant designer touch to any space and context.

Made in Italy.

## Dimensions

A) 13"W x 13"D x 15"3/4H

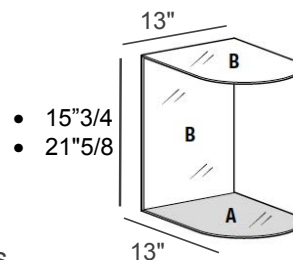

B) 13"W x 13"D x 21"5/8H

## Finishes & Materials
