

Taco

Design: Alessandro Stabile

Description

The Taco soft chair dissipates padding and makes it lighter, stripping away the traditional wooden and polyurethane foam structure. Consisting solely of two layers of natural felt with a slender steel core inside the seat, the body is flat when it is produced and it is given a three-dimensional form when it is folded onto the frame, which holds the edges together thanks to precision milling. A natural balance is struck between soft and clean-cut forms, in a versatile, ergonomic design that is suitable for both the home and contract markets. Made in Italy.

Dimensions

24"3/8W x 22"7/8D x 31"H (SH: 17"3/4)
