

## Saint Paul

*Design: Marco Piva*

### *Description*

If the Saint Paul Chapel in New York is the oldest surviving church building in Manhattan, and since 1960 a national historic monument, the voluminous dresser Saint Paul by SMP for OAK with its soft and delicate lines expresses the true essence of contemporary design.

Nine drawers divided on three columns expand downward: the three drawers of the last row are the largest and most capacious. The soft colors of the simple and elegant interior of the chapel recur instead in the leather cover of the drawers of the dresser Saint Paul.
