

Air

Design: Daniele Lago

Description

Blocks and voids take turns to give shape to a modern and stylish sideboard.

The Air system has expanded to include this elegant sideboard that plays on the contrast between solids and voids, inverting the order of factors: the piece seems to float in air, supported by transparent tempered glass sheets to create a surprising effect of suspension.

The innovative XGlass technology combines the elegance of glass with the magic of elements such as marble, metal, wood and fabrics, affording mesmerizing textured effects.

A storage solution with minimal and elegant lines, it fits into interiors with a refined character which comes in two different versions, one with tempered-glass legs extremely resistant to knocks.

Available optional accessories: glass top, back and bottom LED light.

Made in Italy.

Finishes & Materials

Fronts: Lacquered, Polished and Matt Glass or XGlass.

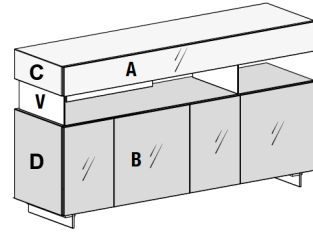

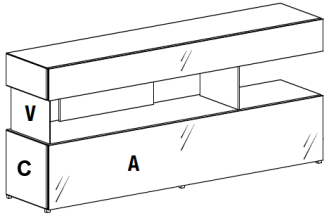

Structure: Lacquered.

Supports: Tempered Glass.
