

Plenum

Design: Franco Lago

Description

The Plenum sideboard is a monolithic piece entirely covered in glass, a perfect solid for clothing with different materials, eliminating the perception of thickness, in a fine material that preserves its beauty unchanged over time. Digital technology allows us to create seamless continuity in the veining, adding value to our products, available in both a polished and matt finish.

The sideboard has coplanar sliding doors that eliminate bulk and open to reveal generous storage space. Available optional LED lighting on the glass shelves inside the unit, creating beautiful, user-friendly spaces, adding to the look of a product that leaves no stone unturned.

Made in Italy.

Finishes & Materials
