

Redondo

Design: Patricia Urquiola

Description

Lounge chair with cold injected polyurethane and polyester fiber with internal steel frame. Polypropylene glides. The fabric covers are quilted in a specific pattern designed by Patricia Urquiola. The Redondo collection covers are removable only for size B. Available with feet in black polypropylene screwed to the structure 1"5/8H, or with swivel base.

A collection with a distinctive two-part shape, the padded shell embraces the huge seat cushions. Its curves are shown off by the total absence of sharp corners and the softness of the fabric, and the quilted decoration where the thread, like the lines of a pencil, draws an elegant three-dimensional form to call to the senses. Made in Italy.

Redondo
