

Avalon 21668 / 21669

Description

Suspension lamp with a distinctive circular form. Characterized by a disc-shaped structure, Avalon features a central glass element that extends both internally and externally, offering a dualistic lighting effect.

The circular steel structure adds a touch of modernity, while the central satin glass contributes to diffusing a warm light both inside and outside the disc. This dual lighting creates a unique atmosphere, playing with suggestive shadows and luminous reflections.

Crafted with artisanal attention, Avalon is a harmonious blend of contemporary design and functionality. Offered in 2 models, with or without central diffuser. Made in Italy.

Light source:

21668 (with central glass diffuser): 37W Strip LED - 4000K • 4000 lumen

21669 (without central diffuser): 30W Strip LED - 4000K • 4000 lumen

Dimensions

Ø23"5/8 x 5/8"H + 51"1/8 of cable

21668 Canopy: Ø8"5/8

21669 Canopy: Ø6"5/8
